INDEX TO VOLUME 74

*Starred items are "Shorter Notes"

Alesina, Alberto. *Equivalence of norms for coefficients of unitary group representations,* 343.

Anderson, Joel. *On unitary equivalence of representations of C^*-algebras,* 307.

Armstrong, Thomas E. *Infinite dimensional L-spaces do not have preduals of all orders,* 285.

Baker, John, Lawrence, J. and Zorzitto, F. *The stability of the equation $f(x + y) = f(x)f(y)$,* 242.

Barnes, Bruce A. *Properties of representations of Banach algebras with approximate identities,* 235.

Baumann, Bernd. *Über endliche Gruppen mit einer zu $L_2(2^n)$ isomorphen Faktorgruppe,* 215.

Bell, Murray G. *A normal first countable* ccc *nonseparable space,* 151.

Braun, Amiram. *A characterization of prime noetherian p.i. rings and a theorem of Mori-Nagata,* 9.

Brodmann, M. *Asymptotic stability of* $\mathrm{Ass}(M/I^nM)$, 16.

Brown, D. R. and O'Malley, M. J. *A fixed point theorem for certain operator valued maps,* 244.

Burke, Dennis K. *Pseudo-open mappings from topological sums,* 191.

Butler, G. J. *Almost all 1-set contractions have a fixed point,* 353.

*Campbell, Douglas M. *Nonnormal sums and products of unbounded normal functions.* II, 202.

Campbell, Stephen and Daughtry, John. *The stable solutions of quadratic matrix equations,* 19.

Chisholm, Michael E. *k-regular mappings of 2^n-dimensional Euclidean space,* 187.

Cho, Sung Je. *Extensions relative to a II_∞-factor,* 109.

Clarke, Francis. *On* $\mathrm{Ext}_{K_*(K)}(\pi_*(K), K_*(MU))$, 156.

Cohen, Paul E. *P-points in random universes,* 318.

Colton, David. See Wimp, Jet.

Dahlberg, Björn E. J. *An algebra of functions,* 39.

Dashiell, F. K., Jr. *Erratum to "A theorem on C^*-embedding",* 204.

Daughtry, John. See Campbell, Stephen.

Davis, S. W. and Stephenson, R. M., Jr. *Separability and minimal weak base topologies,* 371.

Deslaurier, Gilles and Dubuc, Serge. *Logconcavity of the cooling of a convex body,* 291.

Deveney, James K. and Mordeson, John N. *Pencils of higher derivations of arbitrary field extensions,* 205.

Dror, E., Dwyer, W. G. and Kan, D. M. *Self homotopy equivalences of Postnikov conjugates,* 183.

Dubuc, Serge. See Deslaurier, Gilles.

Dwyer, W. G. See Dror, E.

Eklund, Neil. *Generalized parabolic functions using the Perron-Wiener-Brelot method,* 247.

Fefferman, R. *A note on singular integrals,* 266.

Fellgett, Robin. *Representing ergodic flows as flows built under functions with finite range,* 105.

Fowler, Peter A. *Correction of a generalization of a theorem of Beurling and Livingston,* 56.

Garza, Gene G. *Homogeneity by isotopy,* 379.

Geoghegan, Ross. *Erratum to "Fibered stable compacta have finite homotopy type",* 391.

Goodman, A. W. *Koebe domains for certain families,* 87.

Grinblat, L. Š. *Convergence of measurable random functions,* 322.

Grispolakis, J. and Tymchatyn, E. D. *Weakly confluent mappings and the covering property of hyperspaces,* 177.

Hannsgen, Kenneth B. *An integrodifferential equation asymptotically of convolution type,* 71.

Harris, Gary Alvin. *Higher order analogues to the tangential Cauchy Riemann equations for real submanifolds of C^n with C.R. singularity,* 79.

Hastings, William W. *A construction of Hilbert spaces of analytic functions,* 295.

Hannsgen, Kenneth B. *An integrodifferential equation asymptotically of convolution type,* 71.

Harris, Gary Alvin. *Higher order analogues to the tangential Cauchy Riemann equations for real submanifolds of C^n with C.R. singularity,* 79.

Hastings, William W. *A construction of Hilbert spaces of analytic functions,* 295.

Henson, C. Ward. *Unbounded Loeb measures*, 143.
Herrero, Domingo A. *Intersections of commutants with closures of derivation ranges*, 29.
Hilger, R. W. and Michaliček, J. F. *An integral representation of holomorphic functions*, 44.
Hirschhorn, Philip S. *Coherent group rings and finiteness conditions for CW-complexes*, 368.
Hunt, L. R. and Kazlow, M. *A two-sided H. Lewy extension phenomenon*, 95.
Jech, Thomas and Prikry, Karel. *On projections of finitely additive measures*, 161.
Johnson, David L. *A characterization of compact groups*, 381.
Johnson, David L. and Lahr, Charles D. *Dual A^*-algebras of the first kind*, 311.
———. *Multipliers of A^*-algebras*, 315.
Joseph, James E. *Multifunctions and cluster sets*, 329.
———. *Pseudocompactness and closed subsets of products*, 338.
Kambayashi, T. and Margrave, G. *On homomorphisms from algebraic groups to $GL_n(Z)$*, 223.
Kan, D. M. See Dror, E.
Kazlow, M. See Hunt, L. R.
Kezlan, Thomas P. *On K-primitive rings*, 24.
Kodama, Y. and Koyama, A. *Hurewicz isomorphism theorem for Steenrod homology*, 363.
Koyama, A. See Kodama, Y.
Lahr, Charles D. See Johnson, David L.
Lawrence, J. See Baker, John.
Lucas, Dean. *A multiplication in N-space*, 1.
McDonald, John N. *Approximation by quotients of rational inner functions*, 299.
McKenna, P. J. *On a superlinear elliptic boundary value problem at resonance*, 259.
Marcum, Howard J. *Twisted Whitehead products*, 358.
Margrave, G. See Kambayashi, T.
Markowsky, George. *Free completely distributive lattices*, 227.
Martin, Robert H., Jr. *A maximum principle for semilinear parabolic systems*, 66.
Mathur, Asha. *A note on S-closed spaces*, 350.
Michaliček, J. F. See Hilger, R. W.
Mordeson, John N. See Deveney, James K.
Muldowney, James S. *A necessary and sufficient condition for disfocality*, 49.
Nelson, S. and Triggiani, R. *Analytic properties of cosine operators*, 101.
Nevai, Paul G. *On an extremal problem*, 301.
O'Malley, M. J. See Brown, D. R.
Perlman, S. and Waterman, D. *Some remarks on functions of Λ-bounded variation*, 113.
Prikry, Karel. See Jech, Thomas.
*Rabinowitz, Joshua H. *On monoidal transformations of coherent sheaves*, 389.
Roitman, Judy. *More paracompact box products*, 171.
Rothschild, Linda Preiss. *Local solvability of left invariant differential operators on the Heisenberg group*, 383.
Rudin, Mary Ellen. *Pixley-Roy and the Souslin line*, 128.
Schillo, Paul. See Straight, H. Joseph.
Shelah, Saharon. *Boolean algebras with few endomorphisms*, 135.
Silverman, H. and Telage, D. N. *Extreme points of subclasses of close-to-convex functions*, 59.
Stafford, J. T. *Morita equivalence of simple Noetherian rings*, 212.
Stephenson, R. M., Jr. See Davis, S. W.
Straight, H. Joseph and Shillo, Paul. *On the problem of partitioning $\{1, 2, \ldots, n\}$ into subsets having equal sums*, 229.
Tanaka, Yoshio. *A characterization for the product of closed images of metric spaces to be a k-space*, 166.
Tarnopolska-Weiss, Maryna. *On the number of lattice points in a compact n-dimensional polyhedron*, 124.
Telage, D. N. See Silverman, H.
Treybig, L. B. *Separation by finite sets in connected, continuous images of ordered compacta*, 328.
Triggiani, R. See Nelson, S.

Tymchatyn, E. D. See Grispolakis, J.

Uchiyama, Mitsuru. *Double commutants of C_0 contractions.* II, 271.

Walsh, John J. *Extending monotone decompositions of manifolds,* 197.

Waterman, Daniel. *Fourier series of functions of Λ-bounded variation,* 119.

———. See Perlman, S.

Watson, Kym S. *Linear fractional maps and Jordan algebras,* 35.

Williamson, T. E., Jr. *Geometric estimation of the solution to $x + Tx = 0$ for unbounded densely defined monotone operator T in Hilbert space,* 278.

Wimp, Jet and Colton, David. *Remarks on the representation of zero by solutions of differential equations,* 232.

Zorzitto, F. See Baker, John.
